

IEEE Journal of Electromagnetics, RF, and Microwaves in Medicine and Biology 2020 Reviewers

Dear Reviewers,

As you know, publications form the scientific community's communication network — the worldwide exchange of ideas, methods, and technologies that advances research and builds understanding and cooperation between all nations and communities. The cornerstone of scientific publication is peer review, the only way to guarantee high quality work and communication by preventing plagiarism and false reports. However, this would not be possible without thousands of volunteer reviewers. These individuals use their free time and expertise to aid the editors of the Journal of Electromagnetics, RF, and Microwaves in Medicine and Technology in selecting and publishing the most innovative and impactful work. It is on your shoulders that we add to the great scientific information network. The entire scientific community thanks you for your contributions.

Yong Xin Guo
Editor-in-Chief
