

2022 Reviewers List

The availability of highly qualified reviewers is a fundamental part of the success of IEEE MICROWAVE AND WIRELESS TECHNOLOGY LETTERS as the leading compact-format publication in the broad field of Microwave Theory and Technology. In that sense, we must feel extremely proud and lucky about the high number of volunteering experts across the entire world who dedicate their efforts in a selfless way to provide their timely and rigorous review reports for papers assigned to them. Their priceless service is essential, not only by ethically judging and evaluating the technical impact and novelty of every submitted paper, but also by greatly enhancing their contents from the initial versions to the published ones through their very valuable comments and suggestions. Having internationally recognized reviewers from all the world has a clear positive impact on the final published papers, which are enriched by the wise advice of experts from different research cultures, viewpoints, and experiences, this being the basis of an high-quality peer-review process.

As the least we can do to acknowledge their contribution, the Editorial Board of IEEE MICROWAVE AND WIRELESS TECHNOLOGY LETTERS would like to recognize those individuals who acted as reviewers during the year 2022.*

Thank you very much for your continuous support to the journal, as the entire research community truly appreciates your great service!

ROBERTO GÓMEZ-GARCÍA, *Editor-in-Chief*

*Reviewers who completed at least one review of an original submission during the 2022 calendar year.
